Re: DACA09-99-C-0014, Indian Springs UAVC

To Whom It May Concern:

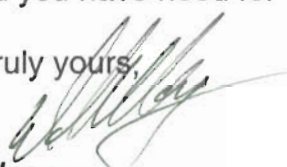

Straub Construction Inc. (SCI) has had the pleasure of working with A & M Fire Protection (A&M) on the UAVC project for the USACE.

A&M was a tiered sub to Helix Electric for the project, providing wiring and systems. SCI was able to work closely with A&M on the warranty follow-up, which we found responses to be very satisfactory.

During the progression of the project, according to Helix Electric, they adhered to both specifications and schedule without encumbrances or complaints.

Should you have need for further information please feel free to contact me.

Very truly yours,

Don Wagner
Project Manager
